

## Data Analysis and Visualization with R for Social Scientists

### Justin Chun-ting Ho

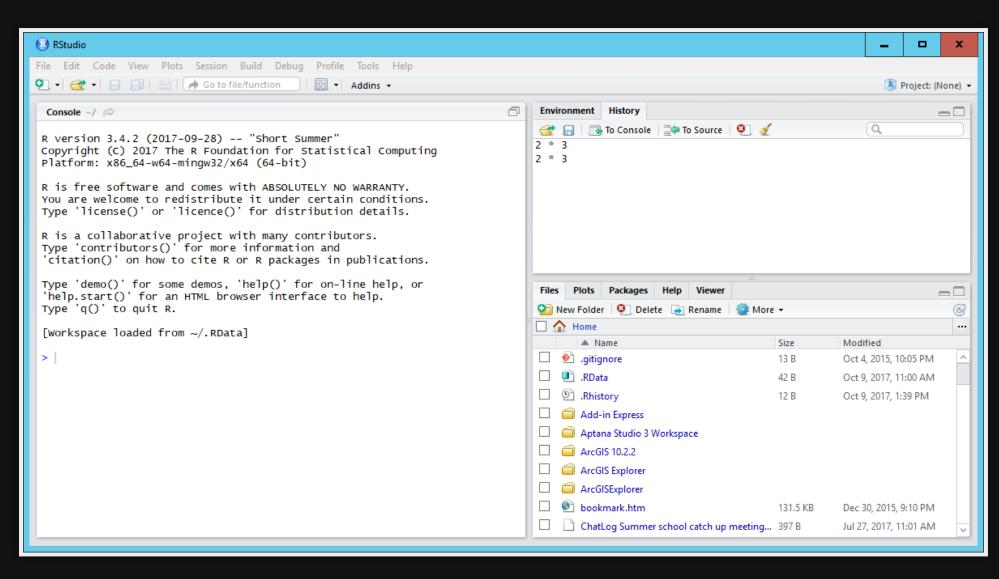

**University of Edinburgh** 

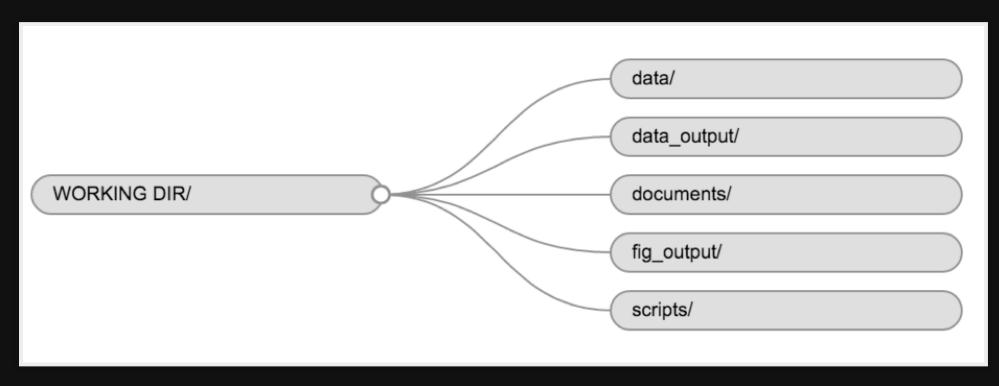

### Create a new project

- Under the File menu, click on New project, choose New directory, then New project
- 2. Enter a name for this new folder, and choose a convenient location
- 3. Click on Create project
- 4. Create a new file where we will type our scripts

#### Interaction with R

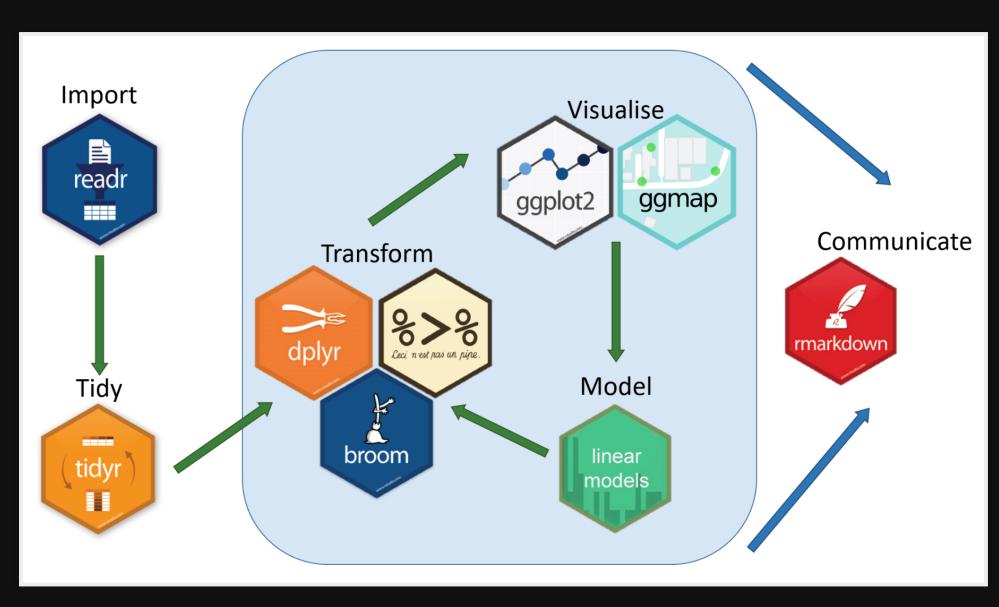

- Type commands directly into the console and press 'Enter'
- Execute commands directly from the script editor using 'Ctrl' + 'Enter' ('Cmd' + 'Return' for Macs)

# Installing additional packages using the packages tab

#### Exercise

• Use the install option from the packages tab to install the 'tidyverse' package.

### Tidyverse

### Grammar of Graphics
